Nearby are the William Gates Computer Engineering Building and Sequoia Hall. Annex, the David Packard Electrical Engineering Building includes the William R. Hewlett, STANFORD graduates David Packard and William Hewlett. The building was constructed with a generous donation from the Packard family. The Science and Engineering quad is a HOWARD AND FINANCING quad. The Science and Engineering quad is also a part of the Stanford Founding Faculty.

The Science and Engineering quad includes the Electrical Engineering Building, the Computer Science Building, and the Mathematics Department.

The Science and Engineering quad is also a part of the Founding Faculty.

In winter 2010, the Stanford Center for Innovation in Learning (SCIL) was established with a generous donation from Susan and David Packard. The center focuses on the integration of technology and pedagogical practices in higher education, with a particular emphasis on active learning and collaborative problem-solving. The SCIL is located in the Packard Engineering Building and is a hub for innovation in teaching and learning.

The STEM Center is located in the Sequoia Hall Annex and serves as a hub for interdisciplinary research and education in the fields of science, technology, engineering, and mathematics. The center includes state-of-the-art research facilities and brings together faculty, students, and industry partners to drive innovation and excellence in STEM education.

The Science and Engineering quad is also a part of the Founding Faculty.
