SECTION 13030

SPECIAL PURPOSE ROOMS

PART 1 GENERAL

1.1 DESIGN REQUIREMENTS

A. General:
   1. Cold storage rooms shall include at least one door equipped with an inside release mechanism that will release the outside latch and open the door from the inside. Cold storage room doors shall be designed to prevent padlocking.
   2. Illumination shall be provided by a lamp controlled by illuminated indicator switches located near the door, both inside and outside of the cold storage room. Light bulbs shall be equipped with protective metal cages. Light switches shall be equipped with shock-preventive rubber covers.
   3. Where electrical outlets are provided in the room, they shall be fusible type.
   4. A fireman's type axe shall be provided in the room, located near the door.
   5. Cold room door thresholds shall be not more than 1/2 inch high for vertical type and not more than 3/4 inch high for sloped type.
